

OptiPure

Model: **OS.64**
Part #: 165-03064

Snapshot

The OptiSoft Water Softener Model **OS.64** is an ion-exchange water softener that is designed to remove up to 64,000 grains of calcium and magnesium hardness minerals at a service flow rate of up to 10-gallons per minute before regenerating. The system meters actual water usage to initiate regeneration. The softener valve has 1" inlet/outlet NPT connections and includes an integrated manual bypass valve. A digital display control board with push-button adjustments simplifies setup and user interface. The polyethylene brine tank holds up to 300 lbs. of salt and includes a safety overflow.

System Benefits

- High Flow 1" softener valve.
- Metered regeneration maximizes efficiency and minimizes waste.
- Push-button digital control panel make installation and service simple.
- System can remove or reduce up to 5 ppm of dissolved iron.
- Includes built-in emergency bypass valve.
- Brine tank salt bridge assures consistent brine and regeneration.
- Brine tank safety valve guards against tank overflow.

ITEM #: _____ QTY: _____
JOB NAME/NUMBER _____

Application

Any application requiring hardness and iron removal.

Pre-treatment for OptiPure RO Systems where hardness reduction is required.

Installation Tips

- Feed-water connection to the system should be COLD only.
- Do not exceed system specifications for temperature and pressure.
- Protect from freezing, system should never be exposed to temperatures below 35° F (2° C).
- Installation and use must comply with all state and local plumbing codes.

Model: **OS.64**
Part #: 165-03064

► Specifications

System	
Softener Tank Dimensions (Height x Diameter, Inches)	59" h x 12" dia.
Brine Tank Dimensions (Height x Diameter, Inches)	33" h x 18.8" dia.
Connection - Inlet & Outlet	1" NPT
Cold Water Operating Pressure Range	20 - 125 psi 1.4 - 8.6 bar)
Inlet Water Temperature Range	40° - 110° F (4° - 38° C)
Shipping Weight	lbs.
Electrical Connection	120V 60Hz 0.5 Amp
Performance	
Nominal Hardness Reduction <small>Performance depends on operating conditions and water chemistry.</small>	30,000 - 64,000 grains (10 - 20 lbs. salt setting)
Service Flow Rate	10.0 gpm (38.0 lpm)
Brine Tank Capacity (Salt)	77 lbs. (35 kg)
